ADDED VALUE THROUGH OUTSOURCING

What characterises efficient resource planning? A focus on the core business and the outsourcing of sub-areas for the exploitation of cost advantages. When you work with Fibox, you place the construction and logistics of electrical and automation systems (EAS) in experienced, reliable hands.

Why Fibox?

Customer needs are becoming more and more exacting, as are the demands for services. Readily available products and short delivery times are essential today;

bottlenecks are not acceptable. Fibox provides valuable support in this area. Fibox manufactures in-house at its own locations, so you benefit from an attractive price level at guaranteed cost. This advantage is complemented by extensive expertise acquired over many years in production and application technology. Fibox has defined the market for more than 30 years. Our customised services are the key to our offering you economically attractive solutions for all EAS processes from planning to production to service.

Service – tailored to your requests

Product Development/Engineering

- Consultation and analysis
- Electrical and mechanical design

- ✓ Benefit from short time-to-market cycles
- ✓ Increase liquidity by reducing current assets
- ✓ Reduction of inventories
- ✓ Commitment and product safety

Our Promise

We are driven by our aspiration of matching precisely your ideas of the best possible product. One Fibox is our promise for maximum added value. As we are specialists in our field, we know how to mesh precisely our ideas with your requirements so that we can offer you more than just an application solution. One Fibox combines broad expertise, long years of experience and driving innovative power for your benefit.

Supply Chain Management

- Worldwide availability
- Direct delivery to the final installation point
- On-time delivery
- Supplier-controlled warehouse management

QUALITY WORLDWIDE

The Fibox Corporation's home is in Finland. Initially founded as an assembly service provider for housings, the company has become a full-range supplier for switchgear cabinets. Fibox Tested Systems Oy began its expansion from Kiuruvesi, Finland, and is today represented worldwide. Ten national subsidiaries and four production sites enable Fibox to serve customer needs around the globe. In addition to the strength of its service, the company's broad, high-quality product line used in many different industries is decisive for its success.
